

Tree facts

Trees, often taken for granted, are an important part of our landscape. Well placed, healthy trees, provide many benefits including beauty, shade, and protection from the wind and snow. The International Society of Arboriculture estimates that, on average, landscaped homes can be valued up to 20% higher than those that are not. Economics aside, trees improve our air quality by taking in carbon dioxide and filtering pollutants, all while generating vital oxygen.

Why hire a certified arborist?

There is more to a tree than meets the eye. Trees are complex living things that interact with the sun, the soil and their surroundings. It may take many years for a tree to develop, it only makes sense to hire professionals who have the knowledge, training, and experience to care for them properly. Poorly done, work such as pruning and cabling can severely damage a tree, making it a liability as opposed to an asset. A certified arborist can tell if your trees are getting what they need to maintain their beauty and strength. Additionally, a certified arborist can be a valuable resource when advising customers about tree care and removal, taking into consideration such factors as safety, appearance and life expectancy.

Arbor Services of CT, Inc.

We are a family owned, complete tree care company whose only business is working with trees. Founded in 1988 by Bill Pollock and his wife Joslyn, every one of our tree workers is trained and qualified according to industry standards. Rarely do teams with this level of experience come together. Bill honed his skills working in various settings, from an internship in Central Park, NY over 20 years ago, to supervising a six to ten man crew responsible for managing a 450 acre tract in New Hampshire. He has a degree in Urban Forestry, is a CT Licensed Arborist, a tree warden, and a Certified Arborist and Tree Climber Trainer with the International Society of Arboriculture.

What we offer

Our services include pruning, removals, cabling, stump grinding, lightning protection, planting, transplanting, and insect and disease diagnosis and treatment, including tick suppression programs. We also offer organic alternatives for insect and disease management. We perform the highest quality work in the safest, most cost effective manner possible. We are fully insured, maintain our own equipment, and our staff receives ongoing training to ensure the best possible job for our customers. We pride ourselves in building relationships with our customers by producing visible results on their properties over time.

EXPERIENCE COUNTS

"You and your team do beautiful work. We so enjoy your winter visits. The place looks terrific. Thanks so much!"

– A customer, Roxbury, CT

"The crew that came Friday did a wonderful job; what a sight to see them all swinging so gracefully so far up. Our thanks to all."

– A customer, Washington, CT & New York, NY

"It was really exciting watching the men climb the big tree, I also liked the bucket truck... it went up so high!"

– Stephen, age 4

"We were so impressed by you and your team. Thank you for the unbelievable professionalism you showed. You wield a chainsaw symphonically."

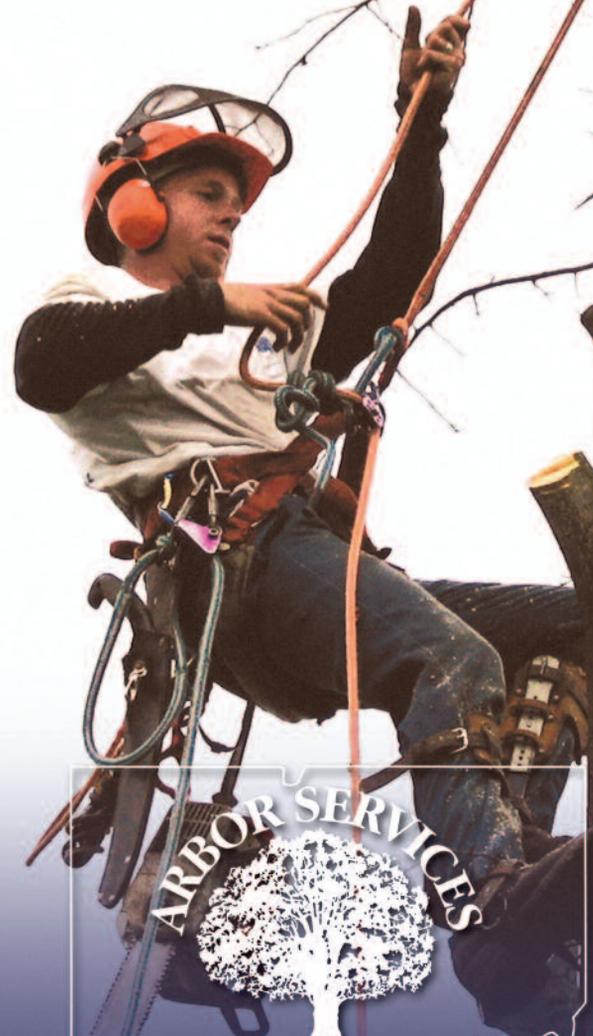

– A customer, Roxbury, CT & NY
